

01

### Understanding Non-Renewable Resources

- Identify and list down non- renewable Resources
- Briefly explain why non-renewable resources are significant and how they are used.

02

### Practicing Accountability for Resource Sustainability

Develop a plan for conserving one of the non-renewable resources. Describe the steps you will take to reduce your consumption of this resource. Resource selected:

Conservation Plan:

Step 1: .....

Step 2: .....

Step 3: .....

Step 4:.....

### Documenting Conservation Efforts

- Keep a daily journal for 2 weeks to document your sustainable and accountable efforts. Be specific.

Day	Sustainable Activities
1	Reduced water consumption during bathing

### Assessing Changes

- At the end of the week, reflect on the changes in your resource consumption patterns.
- How successful were your conservation efforts?
- Were there any challenges or lessons learned?

Changes observed:.....

Success level: .....

Challenges faced:.....

Lessons learned: .....
